KENYA

"The celebrations of Volunteer Managers in Kenya, comes at a time when the National Volunteer Policy in Kenya is being developed by the National Working Group to chart a way forward for volunteerism in the country. Volunteer Managers and Volunteer Involving Organizations have continued to support volunteerism in the country, contributing to development despite the financial challenges related with the volunteer sector.

As we mark this day let us know that volunteer managers in Kenya working closely with the recently registered Volunteer Involving Network Society will continue to appreciate and support volunteers as well as volunteer activities in the country. I appreciate university students, university administration and youth organizations for their great volunteer efforts to such initiatives as donating food and items to less fortunate societies."
